10 2. Methods

11 Footnotes can be entered using this code¹.
12 Figures are included like this.
13 And referenced from here as Fig. 1.
14 Complex tables can use standard LaTeX code as this one.
15 Equations can be used inline $y = \beta_0 + \beta_1 x + \epsilon$ or as usual

$$f(x) = \frac{1}{x}$$

Table 1: Probability to observe Bayes Factors of a certain magnitude or above for the used sample-size of $N = 60$ assuming the original and the null-hypothesis.
