Some red text **which supports** markdown.
References are cited as **?** or (**?**).

2. Methods

- some
- bullet
- points

Footnotes can be entered using this code[1].
Figures are included like this.
And referenced from here as Fig. 1.
Complex tables can use standard LaTeX code as this one.
Equations can be used inline $y = \beta_0 + \beta_1 x + \epsilon$ or as usual

$$f(x) = \frac{1}{x}$$

Table 1: Probability to observe Bayes Factors of a certain magnitude or above for the used sample-size of $N = 60$ assuming the original and the null-hypothesis.

Hypothesis	BF Type	$P(\text{BF} \geq \theta)$		
		$\theta = 3$	$\theta = 10$	$\theta = 20$
$d \sim \mathcal{N}(1.57, 0.51)$	JZS BF$_{10}$	0.98	0.97	0.96
	Replication BF$_{10}$	0.98	0.96	0.96
	Meta-Analysis BF$_{10}$	0.99	0.99	0.99
$d = 0$	JZS BF$_{01}$	0.81	0.00	0.00
	Replication BF$_{01}$	0.98	0.95	0.91
	Meta-Analysis BF$_{01}$	0.63	0.27	0.06

3. Results

4. Discussion

Figure 1: This is gonna be the caption.

Acknowledgements

We'd like to thank bla bla and blablab

Author contributions statement

Must include all authors, identified by initials, for example: A.A. conceived the experiment(s), A.A. and B.A. conducted the experiment(s), C.A. and D.A. analysed the results. All authors reviewed the manuscript.

Additional information

To include, in this order: **Accession codes** (where applicable); **Competing financial interests** (mandatory statement). The corresponding author is responsible for submitting a competing financial interests statement on behalf of all authors of the paper. This statement must be included in the submitted article file.
